DETAILED ACTION

Claim Objections

1. Claims 16-20 are objected to because of the following informalities:

Claims 16-20 are directed to an apparatus. However, claim 16, line 3, recites "the switching node" and claim 17, line 2, recites "another switching node." The apparatus does not explicitly identify that it is a switching node. The examiner suggests changing the preamble to -- A switching node apparatus-- in order to clearly identify that the switching node is the apparatus.

Claim 19 lacks a period.

Appropriate correction is required.

Allowable Subject Matter

2. Claims 1-20 are allowed over the prior art of record.
3. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record such as the Martini et al. publications fails to anticipate or make obvious the use of the tunnel key to generate VC labels. Martini uses tunnel labels which differ from a tunnel key.
